Replacement Page 1

New Claims

- 5 1. A method of providing a pet with a benefit relating to effective assimilation of a lipid or lipid fraction comprises the steps of administering to the pet, as a part of, or in addition to, its regular diet, an edible composition that contains an intestinal mucosa function-promoter in an amount effective to maintain, improve or enhance the capacity of the pet to digest lipid.
- 10 2. A method according to claim 1 wherein the composition further includes a pancreatic function-promoter and/or a liver function-promoter.
- 15 3. A method according to claim 2 wherein the pancreatic function-promoter comprises a lipase or a gut pH modifier.
- 20 4. A method according to claim 2 wherein the liver function-promoter is selected from taurine, emulsifiers, vitamins, minerals, glutathione and glutathione promoters, and combinations thereof.
- 25 5. A method according to any one of the preceding claims wherein the intestinal mucosa function promoter includes a fat transportation aid, agent or carrier.
6. A method according to any one of the preceding claims wherein the benefit to the pet is related to at least one of gut function, outward appearance, pet-to-owner relationship, aging and general health aspects.
- 30 7. A method according to claim 6 wherein the benefit is related to aging, and is observable in any one or more of:
 - Delayed onset of signs of aging;
 - Amelioration of an age-related effect;
 - Improved vision;
 - Restored functionality of the digestive system in an aged pet; and
 - Increased longevity.
- 35 8. A method according to claim 6 wherein the benefit is related to outward appearance and is observable in any one or more of
 - Improved body condition;

Replacement Page 2

- Improved muscle tone;
- Improved skin and coat condition; and
- A younger look.

- 5 9. A method according to any one of the preceding claims wherein the composition is in the form of a nutritionally balanced, ready-to-eat meal.
- 10 10. A method according to any one of the preceding claims wherein the composition is in the form of a meal supplement.
- 10 11. A nutrition management regimen for maintaining, improving, promoting or otherwise enhancing lipid digestibility comprises a dietary component for feeding regularly, according to predetermined directions, to a pet animal, the dietary component comprising intestinal mucosa function-promoter in an amount effective to maintain, promote or enhance the capacity of the pet to digest lipid.
- 15 12. A regimen according to claim 11 wherein the dietary component further comprises
- 20 - A pancreatic function promoter and/or
- A liver function promoter.
13. A regimen according to claim 12 wherein the pancreatic function-promoter comprises a lipase, a gut pH modifier or a pancreatic extract.
- 25 14. A regimen according to claim 13 wherein the gut pH modifier includes one or more of an acidifier, an alkalanizer, a buffer, a prebiotic or a probiotic micro-organism.
-
- 30 15. A regimen according to claim 12 wherein the liver function-promoter is selected from taurine, emulsifiers, vitamins, minerals, glutathione and glutathione promoters and combinations thereof.
16. A regimen according to claim 12 or claim 15 wherein the liver function-promoter is a nutrient that increases endogenous glutathione after ingestion.
- 35 17. A regimen according to claim 12 wherein the intestinal mucosa function-promoter includes a fat transportation aid, agent or carrier.

18. A regimen according to claim 17 wherein the aid, agent or carrier is selected from whey protein and proteases having the capacity to promote the formation of lipoproteins.
- 5 19. A regimen according to claim 17 or 18 wherein the intestinal mucosa function-promoter includes an anti-inflammatory agent, lactoferrin, a prebiotic or a probiotic micro-organism.
- 10 20. A regimen according to claim 19 wherein the anti-inflammatory agent is an omega-3 fatty acid.
21. A regimen according to claim 17 wherein the fat transportation aid, agent or carrier has a fatty acid profile specially-selected to improve absorption.
- 15 22. A regimen according to claim 21 wherein the fatty acid profile is polyunsaturated.
23. A regimen according to claim 21 wherein the fat transportation aid, agent or carrier comprises whey protein.
- 20 24. A regimen according to any one of claims 11 to 23 wherein the benefit derivable by the pet from effective assimilation of a lipid or lipid fraction is related to at least one of gut function, outward appearance, pet-to-owner relationship, aging and general health aspects.
- 25 25. A regimen according to claim 24 wherein the benefit that is related to gut function is observable in any one or more of:
- Increased nutrient and energy digestibility;
 - Improved gut microflora, such as is observed in decreased small intestine bacterial overgrowth;
 - Improved fecal consistency and/or odour;
 - Optimized fecal volume;
 - Improved regularity of food transit time;
 - Reduced flatulence;
 - 35 - Enhanced gut detoxification; and
 - Improved absorption of fat-soluble nutrients.
26. A regimen according to claim 24 wherein the benefit that is related to outward appearance is observable in any one or more of:

- Improved skin and coat condition; and
- A younger look.

5

27. A pet food product comprising an intestinal mucosa function-promoter for in an amount sufficient to maintain, promote or enhance the capacity of the pet to digest lipid, when administered to a pet animal regularly according to predetermined directions.

10

28. The product of claim 27 further including an ingredient selected from the group consisting of pancreatic function-promoters and liver function-promoters and combinations thereof.

15

29. The product of claim 27 or claim 28 wherein the ingredient is provided in a container for addition to a separately packaged complete meal or for administering apart from a meal.

30. The product of any one of claims 27 to 29 provided in the form of a kibble.

20

31. The product of any one of claims 27 to 29 provided in the form of a complete meal.

25

32. Use of an intestinal mucosa function-promoter for the manufacture of an edible composition for a pet to maintain, improve or enhance the capacity of the pet to digest lipid.

33. The use according to claim 32 wherein the intestinal mucosa function-promoter includes a fat-transportation aid, agent or carrier.

30

34. The use according to claim 33 wherein the aid, agent or carrier is selected from whey protein and proteases.

35

35. The use according to claim 32, 33 or 34 wherein the intestinal mucosa function-promoter includes an anti-inflammatory agent, lactoferrin, a prebiotic or a probiotic micro-organism.

36. The use according to claim 35 wherein the anti-inflammatory agent is an omega-3-fatty acid.
